## ABOUT ME

Software developer currently studying at Scaler with a focus on Data Structures, Algorithms, and Full-Stack Development. Built real-world projects using React, JavaScript, Node.js, and MongoDB. Strong foundation in problem-solving, clean UI design, and scalable application development. Looking for software development opportunities to contribute and grow in a production environment.

---

## SKILLS

- **Frontend** - React, Html, CSS, Javascript
- **Backend** - Node.js, Express.js
- **Tools & Environment** - Git, GitHub, Postman, Linux, Mac, Windows
- **Core Concepts** - Data Structures & Algorithms, REST APIs, Problem Solving
- **DataBase** - MongoDB, MySQL
- **Language** - Javascript, Java

---

## PROJECTS

### BandJam :

Practice Room Booking Web App

- Web application that helps musicians find and book available practice rooms.
- Users can sign up either as musicians or room owners.
- Musicians can search and book rooms, while owners can list and manage their spaces.
- Backend built with Node.js and MongoDB to handle users, rooms, and bookings.
- Focused on a clean UI and smooth booking flow.

**Tech:** React, Node.js, Express.js, MongoDB

### Weather App :

A simple web application that displays real-time weather information for any searched location using an external API ([Weather Api](#)). The UI updates based on weather conditions and is designed to be clean and easy to use.

**Tech:** JavaScript, HTML, CSS, API Integration

---

## EDUCATION

**Scaler Academy** - Software Development Program (2023 – Present)

**Doranda College, Ranchi** - Bachelor of Business Administration (BBA) (2020 – 2023)

---

## ADDITIONAL

I'm a beginner learning Japanese(self study) and interested in working with an international team to contribute to a global product.
